

An aerial photograph of a dense urban area, likely a city center. The image shows a complex network of streets and buildings. In the center, there is a large, multi-story building with a flat roof, possibly a government or institutional building. Surrounding it are numerous smaller buildings, mostly residential, with varying roof colors and styles. There are also several green spaces, including a large park area in the bottom left and smaller green patches throughout the city. The overall impression is of a well-developed, historic urban environment.

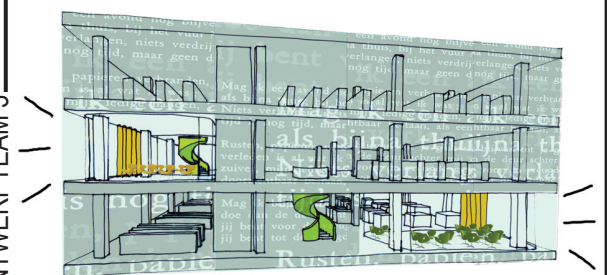

The four photographs show different views of the 'De Nieuwe Dorpsstraat' housing project in Rotterdam, designed by Aldo van Eyck. The images illustrate the integration of modern architecture with traditional urban fabric and greenery.

- Top Left:** A view of a modern, multi-story apartment building with a grid-like facade, situated behind a row of trees. A street with parked cars and a bus is in the foreground.
- Top Right:** A view of a modern building with a distinctive, angular facade, situated next to a row of trees. A street with parked cars and a bus is in the foreground.
- Bottom Left:** A view of a modern building with a distinctive, angular facade, situated next to a row of trees. A street with parked cars and a bus is in the foreground.
- Bottom Right:** A view of a modern building with a distinctive, angular facade, situated next to a row of trees. A street with parked cars and a bus is in the foreground.

An architectural rendering of a proposed new building for the University of the Pacific. The building features a prominent green, vertically-ribbed facade on its upper level, with large glass windows and doors on the ground floor. A wide, white ramp leads up to the entrance. The building is situated on a flat, grey ground, and a small tree is visible near the entrance. The background shows a simple, light-colored sky and a distant horizon line.

het binnenplein van Het Pand. De brede inkom aan de winkelpromenade wordt gecombineerd met het leesscafé, dat een winterterras krijgt in de stadsfoyer. Verder zijn hier de meest dynamische programmaonderdelen omheen gelegd: internetcafé, krantenhoek, CD/DVD uitleen, kiosk, expositie, polyvalente zaal en een 'bestsellerboulevard' die leidt naar een leesbalcon.

Op het maastraster van de parking worden gebouwdelen geprojecteerd als reusachtige boekenkasten, die kunnen variëren in hoogte. Tussen twee hiervan wordt een hellend dak gedacht waardoor de stadsfoyer ontstaat. In het midden is een grote patio met bomen vrijgehouden, die een natuurlijk rustpunt vormt in de bibliotheek en licht en lucht toelaat in de parking. De architectuur wijst de weg van stadsfoyer naar leesbalcon en hogerop in het noordelijke gebouwdeel naar een stille studiezaal met uitzicht over Waregem.
